

# ALLEGRO TRANSATLANTIC

27 December 2024

## INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Benchmark Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone).

The Fund is actively managed, the equity exposure may significantly deviate from the components of the Benchmark Index. The fund is article 6 of SFDR. The Portfolio exposure to each of the two following indices (Euro Stoxx 50 Price EUR Index (SX5E); and the (S&P 500 Index (SPX Index) will be predominantly weighted in accordance with (the "Methodology") developed by the Management Company. The Management Company retains discretion to deviate from such Methodology on an exceptional basis. The Portfolio consists primarily of financial futures positions rolled on financial indices. Rolled financial futures composing the Portfolio will be selected by a proprietary methodology designed by the Management Company which relies on a financial analysis that ranks the instruments of the Investment Universe. The variable exposure mechanism implemented by the Fund aims to provide the Fund with an average exposure to equity markets over five years that exceeds 80%. The Portfolio will be rebalanced monthly respecting the methodology. However, the Management Company may decide to rebalance the Portfolio at any time at its discretion (the "Rebalancing Date"). In order to mitigate risks or enhance the Sub-Fund's performance, the exposure of the Fund to equity markets through the Portfolio may vary between 0% and 200% on a weekly basis at least. As a result, the exposure may drift between such adjustments.

The Fund activated share class distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

## MONTHLY COMMENT

The month of December was significant in terms of monetary decisions, with annual market trends generally continuing to be observed.

In the United States, November's inflation came in at 2.7% on an annual basis, but with underlying inflation at 3.3%, the Fed was only able to cut its rates by 25 basis points, bringing them to 4.50%, as expected. With the imminent arrival of Donald Trump, the markets now anticipate only 2 rate cuts for 2025. Meanwhile, the ECB continued its pace of 25 basis points rate cuts initiated in the middle of the year (3% for the deposit facility rate). The main reasons are inflation that is increasingly approaching its 2% target (2.2% in November on an annual basis in the euro area) and weak growth (0.4% in Q3 2024).

In the stock markets, there were profit-taking activities with notable corrections, but without any impact on the overall very positive annual performances. The S&P 500 lost 2.7% with the hawkish tone of the Fed, which raised the risk premium as 10-year Treasuries climbed 35 basis points to a yield of 4.57%. In Europe, the EuroStoxx 50 increased by 1.35% this month to end a positive year (7.8% YTD).

According to consensus forecasts, analysts expect a roughly 9% increase in the profits of European companies in 2025. This forecast comes in the context of an economic recovery for Europe and the continued decline in ECB rates, which is expected to support profit growth for European companies in 2025.
