

PERSPECTIVE TRANSATLANTIC

31 July 2024

INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone). The Fund is actively managed, the equity exposure may significantly deviate from the Index. The fund is article 8 of SFDR. Equities of the Portfolio will be selected (proprietary methodology) by the Management Company, relying on both financial and best-in-universe extra-financial analyses that rank the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria, as well as an assessment of a low adverse impact on Biodiversity relatively to their industry peers. Equities of the Investment Universe will be ranked using MSCI ESG rating methodology which identifies ESG material risks and opportunities for each industry through a quantitative model that looks at ranges and average values for each industry for externalized impacts such as carbon intensity, water intensity, and injury rates. Equities with the highest ESG rating will be retained by excluding at least 20% of the equities comprising the Investment Universe with the lowest ESG rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. The exposure of the Fund to European equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments. The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

July proved to be a volatile month for equity markets. Following the results of the French elections, initial market reactions revealed an easing of investor concerns regarding a potential takeover by the far-right. This renewed confidence reflects a widely-held view that the most likely outcome is the absence of an absolute majority, thereby reducing the risk of drastic budgetary changes.

In the UK, the British stock market performed well, aided by stronger-than-expected economic growth for the second quarter. The FTSE 100 increased by 2.53%, the Stoxx Europe by 1.43%, and the CAC 40 by 0.77%.

Across the Atlantic, the US consumer price index came in below expectations (3% year-on-year vs. an estimate of 3.1%). Investors expect the US Federal Reserve to lower interest rates for the first time in September and forecast three rate cuts in the US by the end of the year. Meanwhile, over two-thirds of companies that reported earnings exceeded expectations. However, the technology sector came under pressure due to weaker-than-expected results from Alphabet, Microsoft, and Amazon. The S&P500 gained 1.22% over the month.
