

SG29 MAS FUNDS - STEP PREMIUM

31 December 2024

INVESTMENT OBJECTIVE

The investment objective of SOLYS – SG29 MAS Funds – STEP Premium (the "Sub-Fund") is to seek capital appreciation over the long term by being exposed to carry strategies whose performance are mainly linked to US equity volatility markets (collectively the "Strategies"). The Sub-Fund falls within the scope of Article 6 of SFDR. The Sub-Fund seeks to achieve its investment objective by providing exposure to options traded mainly on US equity indices. The Sub-Fund will mainly be exposed to Strategies that systematically sell short-term put options several available trading days during the week with various maturities. The Sub-Fund's intention is to provide investors with a way to access an alternative exposure to equities. The Strategies deployed by the Sub-Fund will mainly be "Short Volatility" strategies. A "Short Volatility" Strategy means the Sub-Fund will sell options that are expected to increase in value when the market becomes more volatile. The Sub-Fund's investment strategy generates positive performance under stable or bullish equity markets conditions but, may suffer from negative performance in particular in the event of sudden drops in the market over a short period of time. The Sub-Fund will have discretion in selecting and weighting the Strategies. To select a Strategy and determine the composition of the portfolio from time to time, the Sub-Fund will follow an investment process based on due diligence and qualitative and quantitative criteria. The Sub-Fund will particularly pay attention to the robustness and the rationale of each Strategy and its fundamentals during normal or stressed market conditions.

MONTHLY COMMENT

The month of December was significant in terms of monetary decisions, with annual market trends generally continuing to be observed.

In the United States, November's inflation came in at 2.7% on an annual basis, but with underlying inflation at 3.3%, the Fed was only able to cut its rates by 25 basis points, bringing them to 4.50%, as expected. With the imminent arrival of Donald Trump, the markets now anticipate only 2 rate cuts for 2025. Meanwhile, the ECB continued its pace of 25 basis points rate cuts initiated in the middle of the year (3% for the deposit facility rate). The main reasons are inflation that is increasingly approaching its 2% target (2.2% in November on an annual basis in the euro area) and weak growth (0.4% in Q3 2024).

In the stock markets, there were profit-taking activities with notable corrections, but without any impact on the overall very positive annual performances. The S&P 500 lost 2.7% with the hawkish tone of the Fed, which raised the risk premium as 10-year Treasuries climbed 35 basis points to a yield of 4.57%. In Europe, the EuroStoxx 50 increased by 1.35% this month to end a positive year (7.8% YTD).

According to consensus forecasts, analysts expect a roughly 9% increase in the profits of European companies in 2025. This forecast comes in the context of an economic recovery for Europe and the continued decline in ECB rates, which is expected to support profit growth for European companies in 2025.
