

INVESTMENT OBJECTIVE

This Sub-Fund is actively managed meaning that the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective with complete discretion with respect to portfolio allocation and overall level of exposure to the market. The Sub-Fund's investment universe is limited by the components of the Benchmark Index but, is not in any way constrained by the Benchmark Index in its portfolio positioning. The deviation from the Benchmark Index may be significant in terms of weighting proportion as the Sub-Fund will not necessarily invest in all the constituents of the Benchmark Index. The investment objective of the Sub-Fund is to outperform the Stoxx Europe 600 EUR Index NTR (SXXR) (the "Benchmark Index") over a long term horizon by exploiting investment opportunities on five sectorial financial indices being all sub-indices of the Benchmark (energy ex-coal, insurance, health care, automobile & parts and, utilities), while providing a fixed stream of distributions.

MONTHLY COMMENT

The month of November was the most anticipated of the year with the American elections. Donald Trump won the election on November 5, 2024, by a wide margin against the Democrat Kamala Harris.

Following the elections, the stock markets showed very strong performance, with the S&P 500 increasing by 3.8% during the month of November, and the Nasdaq advancing by 2.6% during the same period. This good performance reflects primarily the victory of the Republican party in the general American elections (Presidency, House of Representatives, Senate), without a post-election period of uncertainty. The stock markets responded favorably to this scenario due to the anticipated reduction in taxation on businesses and high-income households outlined in Mr. Trump's program. The performance of stocks also reflects the strong performance of the American economy, with GDP growth in Q3-24 close to 3% and company results consistently exceeding analysts' expectations, with revenue growth close to 8%.

The Fed is expected to make a 25-basis point cut at the December meeting to bring the Fed funds rate to 4.5% and could be more cautious in 2025 if the activity remains well-oriented and inflation remains above the 2% target.

In Europe, financial markets showed the opposite performance. The Euro Stoxx 600 posted a slight decline of 0.2% in November, with a more pronounced decrease for the CAC-40 (-2.6%). European stock markets reacted negatively to the election of Mr. Trump due to the risk of increased tariffs on European products, in a context where exports are an important contributor to growth.

The ECB is expected to decrease its key interest rate by 25 basis points to 3% in December and could make 4 rate cuts in 2025. The increase in French political risk is also evident in the bond market, with the French risk premium against Germany reaching 87 basis points, its highest level since 2011.

We can expect the market to remain volatile in the coming months, as investors digest the initial measures of the new American administration.
