

PERSPECTIVE TRANSATLANTIC

INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone). The Fund is actively managed, the equity exposure may significantly deviate from the Index. The fund is article 8 of SFDR. Equities of the Portfolio will be selected (proprietary methodology) by the Management Company, relying on both financial and best-in-universe extra-financial analyses that rank the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria, as well as an assessment of a low adverse impact on Biodiversity relatively to their industry peers. Equities of the Investment Universe will be ranked using MSCI ESG rating methodology which identifies ESG material risks and opportunities for each industry through a quantitative model that looks at ranges and average values for each industry for externalized impacts such as carbon intensity, water intensity, and injury rates. Equities with the highest ESG rating will be retained by excluding at least 20% of the equities comprising the Investment Universe with the lowest ESG rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. The exposure of the Fund to European equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments. The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

Markets in October were roiled mainly by geopolitical tensions, but with strong economic performance in the background.

The escalating conflict in the Middle East has had a major impact on energy price volatility, raising investors' fears of renewed inflation, a sign that the difficulties of the past three years will continue. Nevertheless, the published statistics were reassuring, suggesting that these concerns will be addressed in the medium term. The clear trend toward the election of Donald Trump as US President has weighed on the bond market, with long rates soaring in anticipation of the fiscal loosening he would implement if elected.

Non-tech companies have reported excellent results, confirming their successful adaptation in a challenging environment and successful repositioning in the standardization of this environment.

After the US election, markets may experience some short-term volatility while analyzing the impact of the nominee's policies. But the Fed should independently continue its interest-rate normalization program and, barring further escalation of geopolitical conflicts, the market should return to its stable path.
