

PERSPECTIVE TRANSATLANTIC

31 January 2025

INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone). The Fund is actively managed, the equity exposure may significantly deviate from the Index. The fund is article 8 of SFDR. Equities of the Portfolio will be selected (proprietary methodology) by the Management Company, relying on both financial and best-in-universe extra-financial analyses that rank the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria, as well as an assessment of a low adverse impact on Biodiversity relatively to their industry peers. Equities of the Investment Universe will be ranked using MSCI ESG rating methodology which identifies ESG material risks and opportunities for each industry through a quantitative model that looks at ranges and average values for each industry for externalized impacts such as carbon intensity, water intensity, and injury rates. Equities with the highest ESG rating will be retained by excluding at least 20% of the equities comprising the Investment Universe with the lowest ESG rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. The exposure of the Fund to European equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments. The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

In terms of economic dynamics, in the United States, the GDP ended the year with a 2.3% Q/Q annualized growth, resulting in a 2.8% growth for the year. The disinflation trend continued, with core inflation ending the year at 2.5%. In this context, the Fed kept its benchmark interest rates steady at 4.25%-4.50%, with a communication that remained cautious in the face of the significant uncertainties introduced by the new policies of the Trump administration.

In Europe, the growth remains weak, at 1.1% in 2024, with significant differences between core economies and peripheral economies. Inflation continued to slow down, with core inflation in France and Italy already below the ECB's 2% target and on a compatible trajectory for other economies. The ECB thus reduced the deposit facility interest rate to 2.75% and communicated that it should continue the rate-cutting cycle.

The stock markets recorded a very strong performance in January. In the United States, the S&P 500 increased by 2.7%, balanced between Growth and Value styles. However, the end of the month was marked by significant volatility in technology stocks, particularly those related to artificial intelligence, following the announcement by the Chinese company Deepseek of a cheaper LLM than its American competitors. In Europe, the stock markets saw a very significant increase, with a 6.3% rise for the STOXX 600, 9.2% for the DAX, and 7.7% for the CAC 40 during the month of January. This performance reflects the prospect of rate cuts, positive earnings surprises in certain sectors such as luxury, and a catch-up compared to the lag in 2024.
