

PERSPECTIVE TRANSATLANTIC

29 November 2024

INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone). The Fund is actively managed, the equity exposure may significantly deviate from the Index. The fund is article 8 of SFDR. Equities of the Portfolio will be selected (proprietary methodology) by the Management Company, relying on both financial and best-in-universe extra-financial analyses that rank the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria, as well as an assessment of a low adverse impact on Biodiversity relatively to their industry peers. Equities of the Investment Universe will be ranked using MSCI ESG rating methodology which identifies ESG material risks and opportunities for each industry through a quantitative model that looks at ranges and average values for each industry for externalized impacts such as carbon intensity, water intensity, and injury rates. Equities with the highest ESG rating will be retained by excluding at least 20% of the equities comprising the Investment Universe with the lowest ESG rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. The exposure of the Fund to European equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments. The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

PERFORMANCE SINCE INCEPTION

MONTHLY COMMENT

The month of November was the most anticipated of the year with the American elections. Donald Trump won the election on November 5, 2024, by a wide margin against the Democrat Kamala Harris.

Following the elections, the stock markets showed very strong performance, with the S&P 500 increasing by 3.8% during the month of November, and the Nasdaq advancing by 2.6% during the same period. This good performance reflects primarily the victory of the Republican party in the general American elections (Presidency, House of Representatives, Senate), without a post-election period of uncertainty. The stock markets responded favorably to this scenario due to the anticipated reduction in taxation on businesses and high-income households outlined in Mr. Trump's program. The performance of stocks also reflects the strong performance of the American economy, with GDP growth in Q3-24 close to 3% and company results consistently exceeding analysts' expectations, with revenue growth close to 8%.

The Fed is expected to make a 25-basis point cut at the December meeting to bring the Fed funds rate to 4.5% and could be more cautious in 2025 if the activity remains well-oriented and inflation remains above the 2% target.

In Europe, financial markets showed the opposite performance. The Euro Stoxx 600 posted a slight decline of 0.2% in November, with a more pronounced decrease for the CAC-40 (-2.6%). European stock markets reacted negatively to the election of Mr. Trump due to the risk of increased tariffs on European products, in a context where exports are an important contributor to growth.

The ECB is expected to decrease its key interest rate by 25 basis points to 3% in December and could make 4 rate cuts in 2025. The increase in French political risk is also evident in the bond market, with the French risk premium against Germany reaching 87 basis points, its highest level since 2011.

We can expect the market to remain volatile in the coming months, as investors digest the initial measures of the new American administration.
