

# PERSPECTIVE TRANSATLANTIC

28 June 2024

## INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone). The Fund is actively managed, the equity exposure may significantly deviate from the Index. The fund is article 8 of SFDR. Equities of the Portfolio will be selected (proprietary methodology) by the Management Company, relying on both financial and best-in-universe extra-financial analyses that rank the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria, as well as an assessment of a low adverse impact on Biodiversity relatively to their industry peers. Equities of the Investment Universe will be ranked using MSCI ESG rating methodology which identifies ESG material risks and opportunities for each industry through a quantitative model that looks at ranges and average values for each industry for externalized impacts such as carbon intensity, water intensity, and injury rates. Equities with the highest ESG rating will be retained by excluding at least 20% of the equities comprising the Investment Universe with the lowest ESG rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. The exposure of the Fund to European equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments. The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

## MONTHLY COMMENT

The European market experienced turbulence following the European elections. Indeed, the dissolution of the French assembly results in a dissolution of its own majority, creating a risk of significant political instability for Europe's second-largest economy.

The banking sector has been most affected by the political crisis. According to the ratings agency Moody's, one of the main dangers for the sector is a prolonged and sharp depreciation of French government bonds.

Over the month, the CAC 40 registered a decline of 6.42% while the EuroStoxx 50 decreased by 1.74%.

In the absence of an absolute majority, these policy fears will be temporary and are unlikely to materialize on a sustained basis in the stock market.
