

SG29 MAS FUNDS - STEP PREMIUM

31 January 2025

INVESTMENT OBJECTIVE

The investment objective of SOLYS – SG29 MAS Funds – STEP Premium (the "Sub-Fund") is to seek capital appreciation over the long term by being exposed to carry strategies whose performance are mainly linked to US equity volatility markets (collectively the "Strategies"). The Sub-Fund falls within the scope of Article 6 of SFDR. The Sub-Fund seeks to achieve its investment objective by providing exposure to options traded mainly on US equity indices. The Sub-Fund will mainly be exposed to Strategies that systematically sell short-term put options several available trading days during the week with various maturities. The Sub-Fund's intention is to provide investors with a way to access an alternative exposure to equities. The Strategies deployed by the Sub-Fund will mainly be "Short Volatility" strategies. A "Short Volatility" Strategy means the Sub-Fund will sell options that are expected to increase in value when the market becomes more volatile. The Sub-Fund's investment strategy generates positive performance under stable or bullish equity markets conditions but, may suffer from negative performance in particular in the event of sudden drops in the market over a short period of time. The Sub-Fund will have discretion in selecting and weighting the Strategies. To select a Strategy and determine the composition of the portfolio from time to time, the Sub-Fund will follow an investment process based on due diligence and qualitative and quantitative criteria. The Sub-Fund will particularly pay attention to the robustness and the rationale of each Strategy and its fundamentals during normal or stressed market conditions.

MONTHLY COMMENT

In terms of economic dynamics, in the United States, the GDP ended the year with a 2.3% Q/Q annualized growth, resulting in a 2.8% growth for the year. The disinflation trend continued, with core inflation ending the year at 2.5%. In this context, the Fed kept its benchmark interest rates steady at 4.25%-4.50%, with a communication that remained cautious in the face of the significant uncertainties introduced by the new policies of the Trump administration.

In Europe, the growth remains weak, at 1.1% in 2024, with significant differences between core economies and peripheral economies. Inflation continued to slow down, with core inflation in France and Italy already below the ECB's 2% target and on a compatible trajectory for other economies. The ECB thus reduced the deposit facility interest rate to 2.75% and communicated that it should continue the rate-cutting cycle.

The stock markets recorded a very strong performance in January. In the United States, the S&P 500 increased by 2.7%, balanced between Growth and Value styles. However, the end of the month was marked by significant volatility in technology stocks, particularly those related to artificial intelligence, following the announcement by the Chinese company Deepseek of a cheaper LLM than its American competitors. In Europe, the stock markets saw a very significant increase, with a 6.3% rise for the STOXX 600, 9.2% for the DAX, and 7.7% for the CAC 40 during the month of January. This performance reflects the prospect of rate cuts, positive earnings surprises in certain sectors such as luxury, and a catch-up compared to the lag in 2024.
